LIVE GROUP SEX THERAPY SHOW **Daniel Packard**

Canadian College Lecturer of The Year, Daniel Packard orchestrates a fun and adventurous, crowd-based conversation that slyly pries open the titillating truths and scary secrets we're not supposed to tell the opposite sex, but need to. What happens then? The truth gets loose, the lid flies off, and a whole lot of relationship-enhancing & hilariously educational steam comes flying out!

Women love the show because they learn helpful information most men will never tell them. Men love the show because they get insight into the way women think. The result for both is more self-confidence and the tools for a more successful relationship.

This fascinating event will have you thinking about sex and love in a much better way!

Ian Connacher spent 3 years researching the issue of plastic pollution, including one month sailing out to the middle of the Pacific Ocean to a naturally occurring plastic graveyard. The result of this research is the highly acclaimed documentary ADDICTED TO PLASTIC.

As a species we are starting to choke on our plastic consumption. Sure, people might be reducing use of plastic bags and trying to minimize their use of plastic packaging, but plastic remains a lethal substance that permeates every aspect of our lives. The truth is, only about 5% of all plastic actually gets recycled. Toxic ingredients in plastic are also being linked to everything from learning disabilities and heart disease to obesity and cancer. This program gives you a better understanding of all the issues surrounding plastic including how we can move forward responsibly. The program features an introduction, a screening of the film ADDICTED TO PLASTIC, followed by discussion and Q & A session.

MYTH AMERICA

How we get our own history wrong & why

Rick Shenkman

- Betsy Ross did NOT sew the first flag?
- Columbus was NOT the first to discover the world was round?

In this humorous and historically accurate presentation, Rick explains why Americans are fond of myths along with who's behind them. His research shows that many of the myths are the product of a concerted campaign to turn Americans into patriotic nationalists. Schools are frightened of creating controversy. Tourism boards are scared of driving away visitors. Rick was the host, writer, and producer of the prime time TV series "Myth America" and author of the wildly popular book.

Mike Shiley felt compelled to find out for himself. Armed with a digital video camera and a homemade press pass, Mike Shiley chronicled a two month journey inside Iraq, interviewing American and Iraqi soldiers, talking to local citizens, and putting himself in situations of great personal risk. Rather than push a political point of view, Shiley lets the camera roll, catching a multitude of real-life moments that tell it like it really is. Mike will begin the program on your campus with an introduction, screen the film and then host a lively discussion, and Q & A.

SUBLIMINAL ADVERTISING

FACT: Advertising agencies invest over \$200 billion annually in advertising. A vast majority of these ads contain subliminal messages.

The evidence is shocking! This program is filled with specific examples of subliminal manipulation. These are not taken from obscure publications. IMMIGRATION CRISIS?

The Solution is Out There

Mike Shiley

How much do you know about the immigration debate?

There are over 11 million people living in the US illegally today. Every day, an estimated 10,000 people risk their lives on a 3-day trek enduring blazing heat by day and freezing cold at night. Over 10,000 people have died crossing our border since 1996. The US Border Patrol is only able to stop 25% of the cross-border flow. Is there a workable solution to this issue? Mike will appear in person to deliver a pre-film introduction, followed by a film screening and an extended audience discussion which includes a possible solution. This solution will be nonpartisan and includes all sides of the debate.
